

The PRO-6000 System was specifically designed for the SOHO (small office & home) use but has also been successfully deployed in pubs, clubs and other commercial properties.

The design uses the same technology as the popular PRO-1000, delivering high quality video and audio over UTP cables.

With 11 Video and audio sources plus 2 CCTV inputs it will support audio-visual signals plus IR control to 6 positions up to 300m distance.

The PRO-6010 5 channel UHF/VHF Tuner, which also supports Teletext services, provides additional flexibility.

The System allows users full interactive control of connected source devices including satellite and terrestrial television, radio, HI-FI and CCTV equipment from any point in the premises using proprietary infrared controls.

Inputs are all RCA (Phono) and the outputs are RJ45, making the system very simple to install. These connections are familiar to both AV installers and most the SOHO users.

The unique design provides for an entry level, low cost audio-visual distribution system where equipment may be positioned in a central location. AV signals and IR control are delivered over a common cable infrastructure that also supports computer networks and telephony services.

Wherever there is a CAT5e outlet installed services can be delivered with minimal disruption. Thousands of satisfied customers enjoy the quality of our audio-visual delivery, which makes this a market leader.

PRO-6004 Phono Receiver

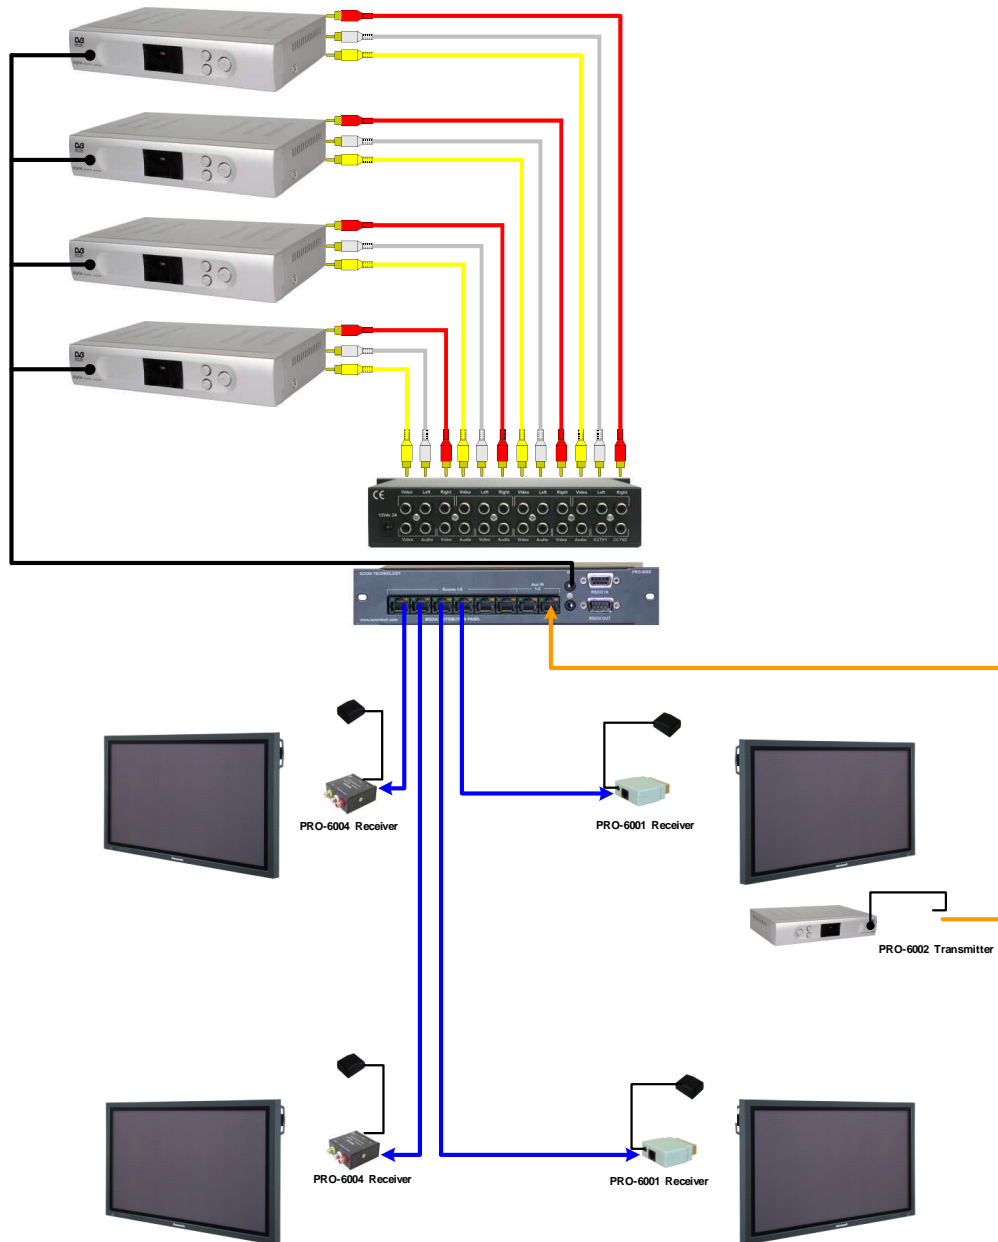

PRO-6001 Scart Receiver

FEATURES:

- **FEATURES:**
- Compact design
- Up to 13 AV inputs
- Full Infrared pass through
- 8 IR Switch ports
- 2 remote/Aux device inputs
- Up to 6 viewing zones
- RS232 control interface
- Forced viewing
- Channel barring

PRO-0201 IR Handset

PRO-6000 Specifications

Input

Video	Bandwidth	15MHz
	Signal Level	1V p-p @ 75 ohm
	Format	PAL/SECAM/NTSC
	Connector	11 x RCA Phono Socket
Audio	2 x RJ45	
	Bandwidth	20Hz – 20Khz
	Signal Level	0dB
	Impedance	10K ohms
	Connector	24 x RCA Phono Socket
	2 x RJ45	

Power

Voltage	12Vdc	IEC 3 Pin Plug
	Fuse	1amp A/S
	Frequency	50/60KHz

Output

Connector	6 x RJ45	
Video	Pins	4 & 5
Audio – Left	Pins	1 & 2
Audio- Right	Pins	3 & 6
Power	Pins	7 & 8
IR	Pins	7 & 8
Looped Video	N/A	
Looped Audio	N/A	

Unit

Height	1RU
Width	235mm
Depth	130mm
Weight	3kg
